**"The danger posed by war to all of humanity - and to our planet – is at least matched by the climate crisis and global warming, I believe that the world has reached a critical stage in its efforts to exercise responsible environmental stewardship."**

**Humanitarian Logistics Conference Monday 21 April 2008**  
**Think strategically, act tactically**

FRITZ  
INSTITUTE

**“In my view, the global demand for humanitarian assistance, which is already considerable, is likely to grow in the coming decade, and to see a major increase in our lifetimes. The biggest single cause, for my money, will be climate change, and the increased incidence and severity of extreme weather events associated with it.”**
